It's just a total anarchy The part of the captain goes to you: create ships, equip them with crews, build your base, fight and keep doing things as usual.. ly/31VBZ1oAbout This GameThe project is in free open beta This is a turn-based space strategy, the action of which takes place in the near future, in the Solar System.. Lack of resources forces people to fight among each other: lots of pirates, alliances and clans start their struggle for survival.. Everything depends on your imagination - The crew of the ship could have crucial importance in battle.. And the crew itself can be really ragtag in a way that next to the pedantic neat pilot and a dedicated mechanic hero can sit a klepto gunner, a mentally ill tactician and a communicator suffering from Tourette's syndrome.. The choice is yours - A battle system that depends entirely on which ship you collected, which crew is in action and which actions you made in each turn.
